

## **A Beef Animal is More Than Meat.**

### **Retail Beef**

197 kg (435 lbs)

### **Beef By Products**

257 kg (565 lbs)

A 454 kg (1000 lbs) steer doesn't yield 454 kg of beef.

On the average, that half ton steer yields only about 197 kg (435 lbs) of retail beef cuts sold in the store.

This is less than half of the live animal's weight. Very little of that other 257 kg (565 lbs) which does not become retail beef is wasted.
